Lunar Calendars

All times and dates given according to Central Oaylight Time.

Planets: At the beginning of this lunation, Saturn is above and to the left of Mars, in the western evening sky. On May 30, Mars will be in a straight line with the Moon and with Pollux and Castor, the bright 'twins' of the constellation Gemini. As Mars and Saturn edge closer to the horizon, night after night, Saturn gradually approaches Mars and finally overtakes it with conjunction on June 17.

Lunar Calendars
